

THE UNITED STATES PATENT AND TRADEMARK OFFICE

Patent No.: 7,178,772 B2
Application No.: 10/735,360
Issued: February 20, 2007
Name of Inventor: Riker, Ronald D.
Title of Invention: MAILBOX POST BRACKET
Conf. No.: 1807

Commissioner for Patents
P. O. Box 1450
Alexandria, VA 22313-1450

Attn: Certificate of Corrections Branch

REQUEST FOR CERTIFICATE OF CORRECTION OF PATENT
(37 C.F.R. 1.322(a))

Submitted concurrently herewith is form PTO/SB/44.

It is requested that the following error be corrected on the front page of the above-identified patent under heading (56) References Cited as follows:

Delete -- 2,552,917 A 5/1951 Becker220/787 --

and

Add "2,552,915 A 5/1951 Zachrich248/221"

A copy of the front page of the patent is attached to this paper with the corrections marked in red.

It is believed that the error is a typographical error made by the PTO, in that the first instance of the error was made on Form PTO-892, "Notice of References Cited" (Ref. A), attached to the Office Action dated September 29, 2004. The Examiner cited U.S. Pat. 2,552,915 by Zachrich in the first and subsequent Actions, but Ref. A of the Notice was typed as U.S. Pat. 2,552,917 to Becker. Becker is not cited by Applicant nor by the Examiner in any of the Office Actions.

It is believed that the error noted above was made by the Patent Office and, therefore, no fee is required. Please send the Certificate of Correction to the attorney of record at the address noted below.

Respectfully submitted,

Mark D. Perdue

(57)**ABSTRACT**

A mailbox bracket comprises a laminar plate that is generally coextensive with a lower surface of the mailbox and has a pair of flanges for securing the mailbox to the plate. A generally cylindrical sleeve is secured to the plate and extends downwardly therefrom. The sleeve is adapted to receive a generally cylindrical post and includes an aperture for use with a bolt or pin to secure the post within the sleeve.
